Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/588,737	Applicant(s) KAKUYA ET AL.	
	Examiner DIEM TRAN	Art Unit 3748	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claims 1-24 are objected to because of the following informalities:

-In claims 1, 2, line 1, “capable of” should be changed to --for--

-In claim 2, line 7, “to the third” should be changed to --to the first--. Appropriate corrections are required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Litorell et al. (US 6,609,364).

Litorell discloses an engine controller comprising an exhaust purifying device (18) capable of purifying NO_x at an air-fuel ratio richer than stoichiometry, wherein a first combustion region, a second combustion region, and a third combustion region are defined as combustion regions having air-fuel ratios of the mixture gas feeding combustion that sequentially vary from rich to lean, wherein combustion regions are switched from the first combustion region to the third combustion region via the second combustion region, or from the third

Art Unit: 3748

combustion region to the first combustion region via the second combustion region (see col. 7, lines 46-67, col. 11, lines 16-20), the engine controller further comprising:

a combustion control means for controlling the mass of intake air introduced (in step 27 in Figure 2) into the combustion chamber upon switching of combustion regions in a manner different from when normal, so as to minimize the mass of NO_x emission downstream of the exhaust purifying device and the torque variation when the second combustion region is passed (see Figure 1, col. 3, lines 61-67, col. 4, lines 1-2, col. 8, lines 35-55, col. 9, lines 3-30, 37-67, col. 10, lines 41-64, col. 11, lines 8-15).

Allowable Subject Matter

Claims 2-14 would be allowable if rewritten or amended to overcome the objections as set forth in this Office action.
